

Project:

HYWIND SCOTLAND PILOT PARK

LOCATION:

Buchan Deep, Scotland

YEAR:

2014-2017

CLIENT:

Aibel

SCOPE/PHASE:

Feed and Detailed Design

PROJECT RESPONSIBLE:

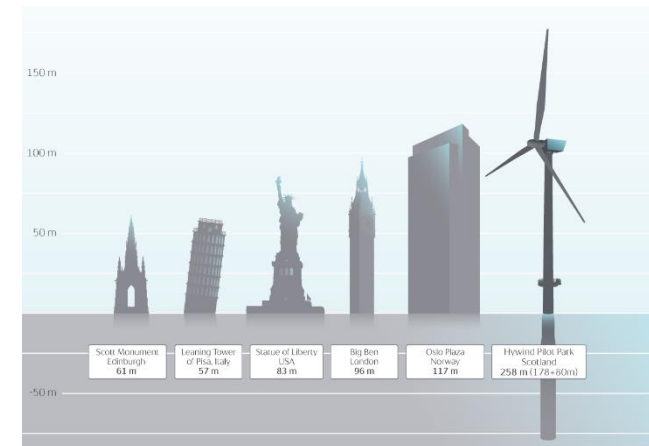

Trond Landbø (tl@olavolsen.no)

PROJECT DESCRIPTION:

Statoil is developing a pilot park, with five 6 MW turbines, outside of Petershead on the east coast of Scotland. The substructures are being constructed in Spain and the final assembly of the full floater, including rotor and nacelle, will be performed at Stord Base.

Olav Olsen has been responsible for the coupled analysis and mooring design as a subcontractor for Aibel, which have been responsible for the engineering of substructure, tower and mooring. Olav Olsen has also performed different local design activities such as mooring console design, in addition to stability evaluation.
